
PROFESSIONAL KITCHEN RESPRAYING

Your Dream Kitchen, For a Fraction of the Price

Factory-Quality Finish

1-4 Day Transformation

Up to 80% Savings

Why We're Passionate About Transforming Kitchens

Three years ago we met a homeowner named Sarah. She loved her oak cabinets, but the dated finish made her home feel tired and a full replacement was unaffordable.

We recommended professional respraying. In just two days she had a modern grey kitchen that looked showroom-fresh at a fraction of the cost.

"Factory-quality finishes, clear pricing, and a transformation you'll love. Guaranteed."

At Pure Finish NW, we treat kitchens as the heart of the home. We make respraying hassle-free and pride ourselves on exceptional, lasting results.

Is Kitchen Respraying the Right Choice for Your Home?

✔️ **RESPRAYING IS PERFECT IF:**

- ✔️ Your cabinets are structurally sound and functional, but the finish is dated, worn, or simply not your style anymore
- ✔️ You want to change the colour or update the look without the expense and disruption of a full replacement
- ✔️ You're looking to increase your home's value before selling or refresh a newly purchased property
- ✔️ You want a factory-quality finish that will last for years

❌ **MAY NOT BE SUITABLE IF:**

- ❌ Your cabinets have structural problems such as rot, severe water damage, or warped frames
- ❌ The cabinet layout no longer works for your needs and you want to reconfigure the space
- ❌ You're looking to change worktops, sinks, or appliances (though we can coordinate with other trades)

Our Commitment to Honesty

We believe in being honest with our customers. If respraying isn't the right solution for you, we'll tell you. Our reputation is built on delivering exceptional results for projects where respraying is the ideal choice.

How We Transform Your Kitchen in Just 2-4 Days

01

EASY ONLINE QUOTATION

Simply send us photos of your kitchen for a fast, fixed-price quote. No sales visits, no pressure, just a clear price and expert advice on our vast colour range (RAL, Farrow & Ball, Dulux).

03

FACTORY-QUALITY SPRAYING

Using professional equipment and premium two-component paints, we apply multiple thin coats. This creates a smooth, flawless finish that looks factory-applied, far superior to hand painting.

02

METICULOUS PREP & PRIME

We remove doors/drawers for off-site spraying and extensively mask your home to protect surfaces. Everything is cleaned, sanded, and primed with specialist bonding primer for lasting durability.

04

FINAL INSPECTION & AFTERCARE

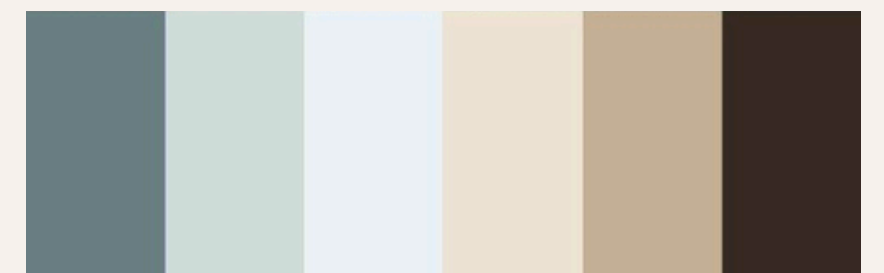

We re-fit your doors and drawers, remove all masking, and leave your kitchen spotless. After a final quality check with you, your "new" kitchen is ready to enjoy.

Rapid Turnaround

Most kitchens are completed within 1-2 days, minimizing disruption to your home life.

We can colour match to any Farrow & Ball, Dulux or RAL options!

The Truth About New Kitchens

(AND WHY RESPRAYING IS OFTEN THE SMARTER CHOICE)

THE KITCHEN INDUSTRY SECRET

Most "new" kitchens aren't actually new at all... they're simply old kitchens with a fresh coat of factory-applied paint.

The cabinets you see in showrooms achieve their beautiful finish through professional spray painting, the exact same process we use to transform your existing kitchen.

THE REALITY OF REPLACING

Buying new often includes showroom overheads, installation, transport and disposal costs — plus disruption to your home. The cabinets themselves are frequently no better quality; it's the finish that makes them look new.

WHY RESPRAYING MAKES SENSE

If your existing cabinets are structurally sound, respraying gives you the same factory-quality finish at a fraction of the cost, with far less waste and disruption.

THINK OF IT THIS WAY:

Would you scrap a classic car for faded paint when a respray restores the look and value? The same logic applies to your kitchen.

THE BOTTOM LINE

Why replace when you can renew? Respraying delivers the same visual result for 60-80% less money, in a fraction of the time, with minimal disruption. It's not a compromise, it's a smarter way to achieve your dream kitchen.

See the Difference: Real Homes, Real Results

Every kitchen has a story, and every transformation begins with a homeowner who dreamed of something better. These are real kitchens we've transformed across Sheffield and surrounding areas.

FAQs

PRICING & PROCESS

Q: Is my online quote accurate?

A: Yes. The price we quote based on your photos is fixed. There are no hidden fees, no sales visits, and no surprises on the day.

Q: How long does it take?

A: Most kitchens are transformed in just 1–4 days. We work efficiently to minimize disruption to your home life.

Q: Can I stay home while you work?

A: Absolutely. We use professional extraction systems to manage fumes, so you can remain in your home comfortably.

COLOURS & FINISHES

Q: What colours can I choose?

A: Anything you want. We can colour-match any shade from major suppliers. We can even match a physical sample if you have a specific tone in mind.

Q: Will it look like a "painted kitchen"?

A: No. We use industrial spray equipment to create a smooth, flawless finish that is indistinguishable from a new factory kitchen.

DURABILITY & QUALITY

Q: How durable is the finish?

A: Extremely. We use specialist two-component paints that are heat, moisture, and scratch-resistant.

Q: Will it chip or peel?

A: Not with our process. Our preparation and chemical bonding primers ensure the paint adheres permanently. We back this with a warranty.

Q: Can you spray laminate or vinyl cabinets?

A: Yes. We use specific adhesion primers designed for difficult surfaces, guaranteeing a rock-solid bond.

Q: Does it increase my home's value?

A: Yes. A modern, fresh kitchen is one of the top features buyers look for, making respraying a smart investment before selling.
